

ESCONDIDO CHARTER HIGH SCHOOL

The Challenge:

Escondido Charter High School was faced with a challenge:

- *Save on electrical costs in order to put more funds back into the classroom.*

ECHS's Founder and President, Dennis "Coach" Snyder, had the foresight eight years ago to install solar on the school's gymnasium roof to save on energy costs. With continued growth, the initial small PV system could not keep up with energy demands. This led the school to look into expanding the size of their system in order to keep electrical costs low so they can invest their funds in the classroom where they belong.
